# OVERVIEW

Our newest Shipping Solution for AccountMate integrates all Shipments and Invoices seamlessly via Web connector to ShipStation, which is one of the most robust and popular cloud shipping solutions on the market- both easy to use yet extremely powerful.

This integration sends all Orders and Shipment information from AccountMate to Shipstation, where the user can process the packages, print labels, shop for the best rates, and even allows for users to utilize a mobile iOS or Android device to process and print labels.

Over 100,000 ERP and eCommerce merchants choose ShipStation , since no other shipping software makes Order Fulfillment quicker, easier and more affordable.

FEATURES

- No AccountMate forms to modify or SourceCode as all are integrated through SQL database
- Single .dll service running on the same SQL server that AccountMate is installed
- No need to install local Workstation Software
- We support any carriers that ShipStation does i.e. UPS, FedEx, USPS, DHL, Purolator, Canada Post, and many more
- Browse Rates
- Label & Email Branding
- SMS Notifications
- Prints carrier approved Shipping Labels after saving each Shipment.
- It writes back to the AccountMate invoice a detail of the shipment to include, package weight, value, freight amount, insurance amount, tracking number, etc. All this information is maintained on a separate invoice child table for easy access.
- Amend shipments function as long as the shipment has not been closed for the day.
- It allows to build a cross reference table for shipping carries to match to SHIP IT available carriers.
- 3rd Party, consignee & Multiple email notification defined by Customer.
- Dimensional weight Inventory cross reference table.
- Create and submit Return Labels and Electronic call tags.
- Package Tracking Report allows viewing, printing or faxing
- Invoiced package information from within AccountMate
